

ATHENA JACOB

Albany, NY • athena.aj.jacob@gmail.com • [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

Full Stack Web Developer specializing in JavaScript, React, and Next.js with hands-on experience building scalable, production-ready applications. Currently completing the Innovation Fellowship with The Knowledge House concentrating on modern web technologies and Agile development. Background in digital marketing and CRM management.

TECHNICAL SKILLS

Technical: JavaScript, Redux Toolkit, TypeScript, React, Next.js, Node.js, Express, Prisma, PostgreSQL, MongoDB, SQLite, Supabase, Tailwind CSS, Bootstrap, Material-UI, Recharts, Vite, Docker, Vercel, Fly.io, Git
Development Tools: VS Code, GitHub, Figma, Notion, Jira, Chrome DevTools, Jest, React Testing Library
Marketing & Operations: Google Analytics, Google Ads, HubSpot, SEMRush, Mailchimp, WordPress, Excel, Canva, Prompt Engineering

EXPERIENCE

Full Stack Web Developer | **PROMETHEUS**

2025-Present

- Architected TAP's Events platform implementing dynamic filtering, RESTful APIs, HubSpot CRM integration, and mobile-first responsive design using Next.js, React, and Tailwind CSS with progressive scaling across all devices
- Engineered bi-directional data sync for automated event registrations with real-time RSVP updates and user engagement tracking
- Built WCAG 2.1 accessibility-compliant interactive components with multi-criteria search functionality and cross-browser compatibility

PROJECTS

FISCIO - Finance Dashboard

Oct 2025

- Developed full-stack finance dashboard using React, TypeScript, Redux Toolkit, Material-UI, and MongoDB featuring ML revenue forecasting model, advanced data visualization with Material-UI DataGrid improving navigation efficiency by 60%, and comprehensive test suite with Jest and React Testing Library reducing bugs by 50%

EcoBridge - Advocacy Platform

Aug 2025

- Developed full-stack advocacy platform using React, Node.js, Express, Prisma ORM, and SQLite database empowering 200+ users with special needs, featuring RESTful API with CRUD operations, authentication middleware, and responsive Bootstrap UI increasing user engagement by 45%

TravelHaven - Travel Planner

May 2025

- Built interactive travel planning application using React, Express, PostgreSQL, and OpenTripMap API with authentication and real-time data synchronization, enabling users to explore 10,000+ destinations with instant cross-device updates while maintaining 99% uptime through custom error handling and rate limiting

EDUCATION

Innovation Fellowship - Web Development Track | **THE KNOWLEDGE HOUSE**

Graduation December 2025

- Completing 900+ hours of intensive full-stack development training in modern JavaScript, TypeScript, React, Next.js, Node.js/Express, and databases (PostgreSQL, Prisma ORM, SQLite)
- Built and deployed 5 production-ready applications
- Applied Agile/Scrum methodologies in team projects: daily standups, code reviews, pull request workflows via GitHub, and cross-functional collaboration using Jira, Notion, and Slack
- Attended technical workshops led by senior engineers from Google, Microsoft, and IBM covering system design, scalable architecture, and cloud deployment (Vercel, Netlify)

STONY BROOK UNIVERSITY

Stony Brook, NY

Bachelor of Arts, Major in Psychology; Minor in Linguistics
